retire.js

You can easily minify and simplify CSS, HTML, and JavaScript code with the help of this add-on. During penetration testing we often land with large chunked JavaScript code which is difficult to read and get to understand the flow of code. In such time this add-on help us in beautifully minifying code in readable format so that we can find flaws in source code.

Beautifier & Minify

Add and modify the HTTP request headers and response headers.

ModHeader

Spoof websites trying to gather information about your web navigation —like your browser type and operating system—to deliver distinct content you may not want.
